

EEL ENERGY, selected to join the 3DEXPERIENCE LAB, the start-up Accelerator of DASSAULT SYSTEMES

3D & simulation take a large part in EEL ENERGY development effort, supporting design & test of its unique undulating membrane tidal concept. EEL ENERGY is therefore very honoured to be part of this start-up selection and to join the 3DEXPERIENCE Lab of DASSAULT SYSTEMES.

EEL ENERGY will leverage on this partnership and on DASSAULT SYSTEMES unique know-how in 3D modelling, to accelerate its product innovation.

Grégoire de Laval, Development Director of EEL ENERGY: *"As EEL ENERGY, we are very proud to be selected to join the DASSAULT SYSTEMES 3DEXPERIENCE Lab. Sharing experiences with other start-ups and leveraging on DS unique know-how in 3D modelling will be of a great help to support & accelerate our design & test project phases".*

About EEL ENERGY:

As the result of 20 years of research of Jean-Baptiste Drevet on the coupling between fluid and undulating membranes, EEL ENERGY company was established in late 2011 to develop an undulating membrane tidal power machine. The EEL® technology is patented on a global basis. Now based in Paris and Boulogne, the company gathers a multidisciplinary team, working with leading Research & industrial partners such as IFREMER, or HUTCHINSON (TOTAL Group subsidiary). Several prototypes have been successfully tested.

About 3D Experience Lab – DASSAULT SYSTEMES:

As part of the overall 3DEXPERIENCE Lab initiative, Dassault Systèmes' accelerator program for startups to help facilitate and nurture disruptive product innovation. Start-ups' physical products must be able to be developed using 3D technologies and must address at least one of the following six themes: City, Life, Lifestyle, Internet of Thing, Ideation and Fablab. Throughout the program, selected startups have access to Dassault Systèmes' 3DEXPERIENCE platform, technical skills and mentoring - the same content, technology, applications and expertise that have transformed the design, engineering and manufacturing of most of the products society relies on today. In addition, Dassault Systèmes' worldwide ecosystem will help accelerate the startups' product launches and international presence.
